NEW FRUIT JAR .--- Please see JOHN Work's new advertisement of to-day, found in another column.

This Jar is for the purpose of keeping Pruit and Vegetables in their original freshness, for any length of time. It is confidently recommended to the public as possessing more desirable qualifications than any Jar which has been hitherto produced. 1st. It has been TWICE subjected to an INTENSE heat of 24 hours each time, and thus rendered incapable of undergo-

ing any deleterious chemical action. 2d. It is as free from porousness as glass, with the advantage of being incapable of being injured by any degree of heat, and it will bear such falls and collisions as would inevitably destroy glass.

3d. It is very superior to tin, in-asmuch as the me'al becomes corroded by the action of the acid of fruit, thus rendering the contents of the Can discolored and acidulated.

4th. It is as reasonable in price as any good Jar hitherto invented, and probably

of 16 pages, full of fun and sentiment .- ors. It is also finely illustrated. Price 6 cts.
